BRIAN C. ROBERTS  
AdministratorAPPLICATION FOR PERMIT UNDER  
POLLUTION CONTROL ACT, 1967  
(Effluent)

*Preamble*—Shawnigan Lake School built a sewage-treatment system in 1959 and has operated it ever since under the regular supervision and inspection of the B.C. Department of Health. We understand that the system has always operated effectively to ensure that the treated effluent is sufficiently pure when it leaves the treatment lagoon that it has no effect on the purity of local bodies of water.

Published below is an application for a permit to continue operating the system. Such a permit is required for all pre-existing installations under the *Pollution Control Act, 1967*, and the application is published for the information of interested parties who should note the following points:

- (1) The application is for permission to continue a successful and well-established system, not to alter it or to increase its capacity.

- (2) The system does not at any time permit sewage to be discharged directly or indirectly into any stream or creek.
- (3) Most of the treated, relatively pure, effluent is dissipated by seepage and evaporation, but the balance is discharged over a weir and into a ditch.
- (4) The point of discharge is over 1,000 feet from Shawnigan Creek and, for much of the year, is not connected to the creek except when there is sufficient rain to fill the ditch and provide very considerable dilution.

THIS APPLICATION is to be filed with the Director, Pollution Control Branch, Parliament Buildings, Victoria, B.C. Any person who qualifies as an objector under section 13 (2) of the *Pollution Control Act, 1967* may, within 30 days of the date of application, or within 30 days of the date of publication in *The British Columbia Gazette* or in a newspaper, or, where service is required, within 30 days of the serving of a copy of the application, file with the Director an objection in writing to the granting of a permit, stating the manner in which he is affected. Those who do not so qualify may file with the Pollution Control Board an objection in writing under section 13 (6), in the same manner and time period as described above.

Shawnigan Lake School, of Shawnigan Lake, hereby applies to the Director for a permit to discharge effluent from the boarding-school located at Shawnigan Lake into Shawnigan Creek, which flows east and discharges into Mill Bay, and gives notice of application to all persons affected.

The land upon which the works are located is Lot 1, Plan 4884, Shawnigan District.

The discharge shall be located at the eastern point of the sewage lagoon.

The quantity of effluent to be discharged is as follows: Average annual daily discharge (based on operating period), 7,000 imperial gallons. Maximum daily discharge, 10,000 imperial gallons.

The operating period during which the effluent will be discharged is September to June each year, less Christmas and Easter vacations (approximately six weeks).

The characteristics of the effluent discharged shall be equivalent to or better than total suspended solids, 75 ppm; BOD, 50 ppm; faecal coliform, 10,000 mpn/100 ml.

The type of treatment to be applied to the effluent before discharge is as follows: Effluent is discharged into a sewage lagoon engineered 15 years ago with the sanction of local health authorities.

I, W. C. Symington, hereby certify that a copy of this application has been received by the Regional District of Cowichan Valley.

This application, dated on the 9th day of September 1974, was posted on the ground in accordance with the *Pollution Control Regulations*.
